Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

Claims 1 and 12 are objected to because of the following informalities: the term "mutual distances" should be changed to "mutual gaps" to remain consistent with the description given in the specification at paragraph [0029]. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6, 10, 11 and 14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The above noted claims are directed to the embodiments shown in figures

Art Unit: 3746

7-8. These embodiments do not have cooling channels formed with mutual contact at the inlet end and a mutual distance (i.e. gap) at the outlet end.

Allowable Subject Matter

Claims 1-5, 7-9, 12, 13 and 15 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose nor make obvious liquid rocket engine member having an outer sheet metal wall and elongated cooling channels which are in mutual contact at the inlet end and have a mutual gap at the outlet end.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Haggender ('253), Niino et al and Hawkinson disclose rocket walls with cooling channels. The examiner notes that the Denison, Jr., Hartman et al, and WO 9529785 references disclose cooled rocket nozzle walls but none of the references disclose the cooling channels being in mutual contact at the inlet end and having a mutual gap at the outlet end.
